Back End	Go, Node.js, Docker, Amazon Web Services, Google Cloud Platform
Data Stores	PostgreSQL

EXPERIENCE

Technical Team Lead/Senior Full-stack Developer | Studio 14 | Birmingham, United Kingdom   MARCH 2019 – PRESENT

Studio 14 is a digital agency that helps SMEs and startups develop and launch exciting and innovative products. Studio 14 has worked with government bodies like Birmingham City Council and organizations like PZ Cussons.

- Led a team comprising frontend, backend, and mobile developers to develop products for clients mostly in the United Kingdom.
- Design/plan product's architecture
- Put together in-house best practices like proper Git workflow, agile, coding style guides, e.t.c.
- Enforced test-driven development.
- Ensured excellent code quality
- Unblocked my team members
- Refactored code for readability and performance
- Technologies: Go, PostgreSQL, Typescript, React/Next.js

Full-stack Developer | Busha Ltd. | Lagos, Nigeria   MAY 2018 – FEBRUARY 2019

Busha is a platform where people can seamlessly buy and sell cryptocurrencies, easily manage their cryptocurrency-investment portfolio. Busha allows users to exchange cryptocurrencies for real cash within 30 minutes.

- Integrated payment and bank deposit with PayStack, enabling users to fund their wallets with debit or credit cards and getting paid in naira after they sold their cryptocurrencies.
- Joined the backend developer to design and create numerous endpoints for the web and mobile apps.

- Created several React components and consumed backend APIs both on the user-facing the admin dashboards.
- Collaborated with hardworking and motivated engineers and designers to build and lunch Busha in just 5 months. Busha achieved 30 million naira transaction volume in the first month.
- <u>Technologies</u>: React, Postgres, MongoDB, Redis.

Software Developer | Andela | Lagos, Nigeria   JULY 2017 – APRIL 2018

Andela builds distributed engineering teams with Africa's top software developers. Andela handles talent assessment, onboarding, and continuous improvement.

- Collaborated with different teams (both remote and local) to build world-class full-stack web applications.
- Completed my 10-month-long software development apprenticeship.
- <u>Technologies</u>: Typescript, React, Angular, Node.js, PostgreSQL.
